## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 12,17,22 and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 recites the limitation "the bus". There is insufficient antecedent basis for this limitation in the claim.

Claims 17,22 and 28 recites the limitation "control data". There is insufficient antecedent basis for this limitation in these claims.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,3,6 are rejected under 35 U.S.C. 102(b) as being anticipated by Mansell (5223844).

Art Unit: 2635

Mansell shows a system that includes a processor 202 and a user interface 340, transmitter 234 and receiver 314 all connected to the processor. The receiver receives current GPS location information from an external source 120. The user interface gathers user commands see figure 5 and col. 24 lines 11-25. The transmitter transmits the current location information see figure 8b col. 22 lines 55+ in addition to the commands from the user entered on the keyboard. Mansell also includes a microphone connected to the processor since element 366 sends voice data to the processor.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5,7-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mansell as applied to claims 1 and 6 above, and further in view of Bertsis (6650894).

In an analogous art, Bertsis shows a location dependent remote control system, where consumer devices are controlled by a remote control signal. The

Art Unit: 2635

system conditionally controls the consumer devices based upon the location of the device and controller. See abstract.

The examiner takes official notice that a command that can control a plurality of devices in sequence according to a single command is common in the art for reducing repetitive user inputs.

The examiner takes official notice that the use of a password or code to permit operation of an electronic device is common in the art for providing secure operation of a consumer device.

The examiner takes official notice that using voice commands as input to a controller is verily common in the art as a known improvement over a keyboard input device for hands free operation.

***Allowable Subject Matter***

4. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

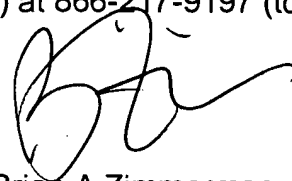

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian A Zimmerman whose telephone number is 703-305-4796. The examiner can normally be reached on Off every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mike Horabik can be reached on 703-305-4704. The fax
